

# Now Offering Flexible Financing Options

Rodders and Jets has partnered with Quail Financial Solutions to bring you the best financing options available. Whether you are a big company, small business or municipality, our financing options can quickly and easily help you acquire the equipment you need without tying up your valuable capital or credit card availability.

## Why use Quail vs the bank:

- Banks typically offer “variable rate” financing. This means that your payment would increase over the time of the financing agreement. With Quail Financial Solutions, we offer a “fixed rate” on the term of your loan for up to 84 months.
- Many banks would require a 20% to 30% down payment on Equipment loans. When financing through Quail, we require very little to virtually no down payment. This allows you to keep your cash on hand longer.
- Most construction equipment would typically need to be upgraded in 5 to 7 years. If you include this equipment in a 30-year project loan, then you would eventually owe more on those items than the original purchase price. Let us match the financing to the life of the equipment

## Program Highlights Include:

- App Only \$500K, terms 24 to 84 months
- Soft Pull
- Approved in hours
- 100% financing, add other equipment
- Deferred & Seasonal Payment options

Choosing The Right Financing Matters.  
Don't make a million-dollar mistake.
